

SETTING STANDARDS

HYDESAILS

HYDE SAILS WAS FOUNDED IN 1965 BY EDWARD HYDE AND KEITH MUSTO. THEIR AIM WAS TO PRODUCE SAILS OF OUTSTANDING PERFORMANCE, CONSISTENCY AND QUALITY AND TO PROVIDE THEIR CUSTOMERS WITH A SERVICE TO MATCH. THESE VALUES ARE AS DEEPLY EMBEDDED IN HYDE TODAY AS THEY WERE 40 YEARS AGO.

THE COMPANY QUICKLY ESTABLISHED ITS REPUTATION, SUPPLYING SAILS THROUGHOUT THE WORLD TO LEADING DINGHY AND KEELBOAT SAILORS. SAILS MANUFACTURED BY HYDE HAVE BEEN USED BY MEDAL WINNERS AT EVERY OLYMPIC GAMES SINCE 1968.

EACH DECADE SINCE THE 80'S HAS SEEN HYDES MAKE SIGNIFICANT ADVANCEMENTS TAKING OPPORTUNITIES TO DEVELOP AND GROW ITS BUSINESS WHILE MAINTAINING ITS CORE VALUES OF PERFORMANCE, QUALITY, SERVICE & TECHNOLOGY.

1980's - MANUFACTURER'S ONE-DESIGNS

Hydes reputation for consistency make them a logical choice for any true one-design dinghy or keelboat. This market developed during the 80's and remains at the core of Hyde's business, with Laser, RS and Topper among their long term customers. Developing this business area is a priority for the future.

1990's - YACHT SAILS

In 1995 Hyde entered the custom yacht market and this is now the fastest growing sector of the business. Hyde now cover the whole spectrum of yacht sails from Grand Prix racing to blue water cruising.

2000 - OFFSHORE MANUFACTURING

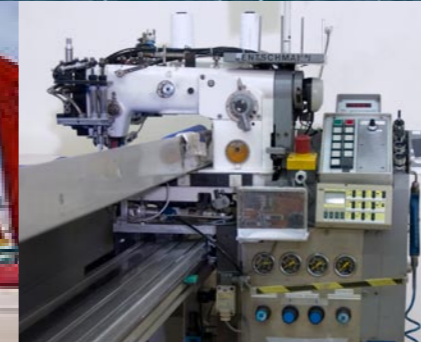

In 2003 Hyde moved their manufacturing to the Philippines and established a new sail loft in Cebu where they now employ 200 staff in 55,000 sq ft (5,500 sq m). The facility is owned and managed by Hyde which ensures that quality and service is maintained at the highest level.

2010 - THE FUTURE

Hyde has ambitious plans for the future. The Company intends to expand its yacht sail market; to maintain its premium position in one-design; to identify and recruit distributors in every major sailing market in the world and to continue to build the strength of its brand.

HYDE MANUFACTURING

THE HYDE LOFT IN THE PHILIPPINES COMPLETED ITS FIRST SAILS IN OCTOBER 2003. AT THAT TIME THERE WERE 16 EMPLOYEES. BY THE END OF 2007 THIS HAD INCREASED TO 200. THE LOFT IS MANAGED BY TWO HYDE SAILMAKERS EACH WITH OVER TEN YEARS EXPERIENCE OF WORKING WITH THE COMPANY.

THE FACTORY

The loft is a world class sailmaking facility, clean, light and air-conditioned. Hyde is committed to being the employer of choice in Cebu and we ensure that working conditions are exceptional. As the loft is wholly owned by Hydes every standard is maintained at the highest level.

THE STAFF

The Philippines are diligent and dextrous and have taken to sailmaking quickly. Staff training is a priority and this is made easier as the first language of the country is English. A great team ethic has developed with everyone enjoying regular social activities.

THE LOGISTICS

Weekly air and sea freight has now become established and some customers have been in receipt of their sails within a week of order. Our network of distributors take advantage of direct shipments, while the head office in the UK acts as stocking, distribution, service and repair centre.

THE EQUIPMENT

Hyde is committed to the use of latest technology to ensure absolute precision in production. An Instron tensile tester is used for checking material, technology only owned by a handful of sailmakers. The company will continue to invest in technology as a major part of its development plan.

HYDE DESIGN

DESIGN IS SEEN AS A CRUCIAL FACTOR IN MAINTAINING HYDES POSITION AS AN LEADING INTERNATIONAL SAILMAKER. THE TALENTED DESIGN TEAM CONTINUE TO PRODUCE RACE WINNING SAILS WHILE DEVELOPING MATERIALS AND SAILMAKING SYSTEMS IN PARTNERSHIP WITH KEY SUPPLIERS.

THE SOFTWARE

The success of any design office depends not only on the skills and qualifications of its operators but also the software used. Hyde have invested in the latest design package, SailPack, which was developed by Americas Cup syndicate Luna Rossa. SailPack can be used to design sails for any rig or hull design and includes more detail than any other design programme on the market. Quantitative testing is possible to a level only previously available to the most well financed teams and projects.
