GRAND PRIX SAILCLOTH CHOICE

XTech - Kevlar yarns sandwiched between two layers of Polyester film. A version with one layer of taffeta is also available, which makes the material more durable

GPL - carbonfibre yarns sandwiched between two layers of Polyester film. GPL is the most stable laminate on the market but does require careful handling

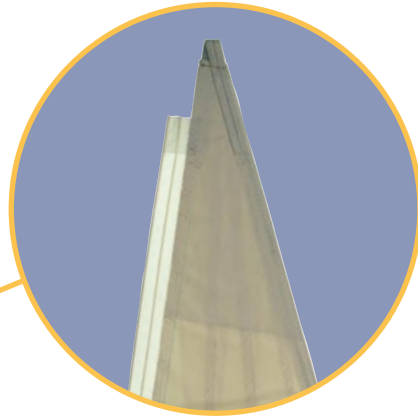

H5 - the new Hyde membrane system. H5 is available in a large variety of fibres and constructions

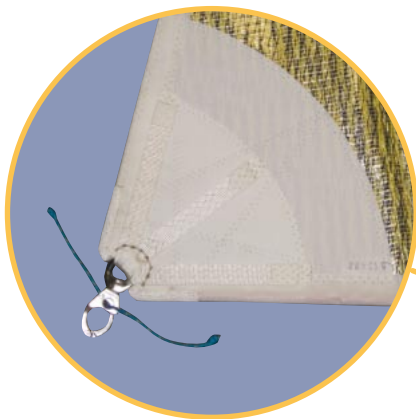

See separate information sheet for full details of the Hyde sailcloth range.

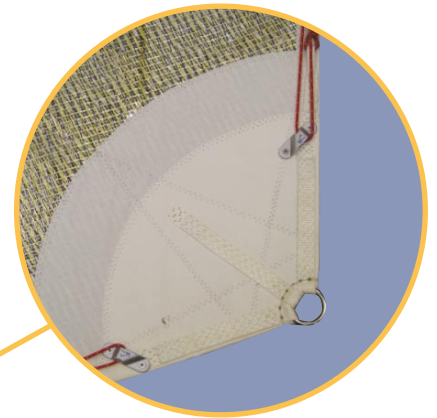

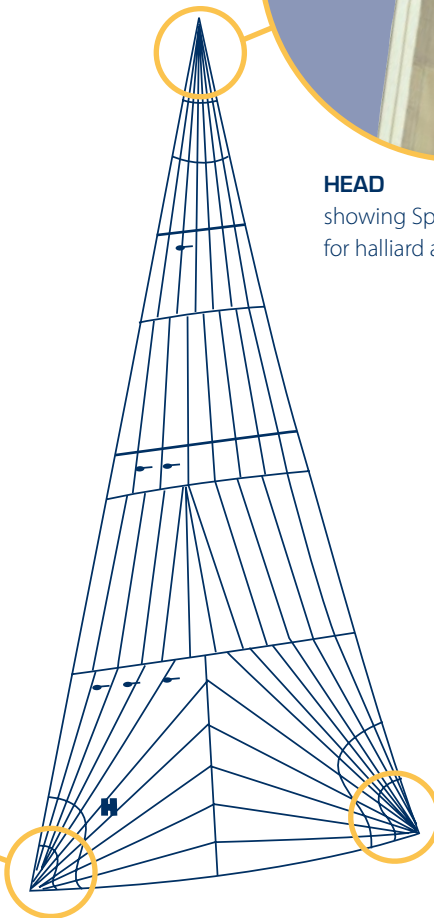

BLADE NO3 SHOWING LEECH BATTENS.

HEAD
showing Spectra reinforced loops
for halliard attachment.

TACK
showing Snap Shackle with
quick release line.
