Outsmart The Sun

Given the great number of people in the world now concerned with the effects of the sun and skin cancer, sun safety should be an important part of our lives.

Sceadu is an extraordinary biminitorp designed to create shade in a modern, functional, practical and aesthetic way.

If you compare Sceadu with traditional biminitorps it offers you several major advantages.

The Screen

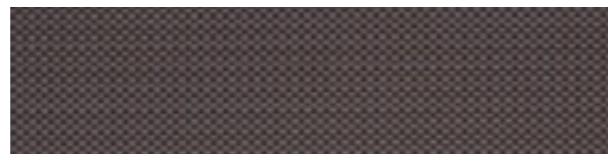

By sliding and tilting Scedu's unique screen you can follow the sun around, even when it's very low. This feature enables you to instantly change the position of the screen to create shade where you need it.

Scedu's screen fabric is made of an open, transparent material woven from glass yarns, coated with a bulk-dyed polymer compound. This fabric has a very high level of UV-resistance, weather resistance and mechanical properties. The fabric stops up to 90% of the solar energy, without blocking out the light of the sun completely. The open structure of the fabric also keeps the temperature from rising too high under the screen. The transparent fabric makes Scedu suitable for use while sailing.

Standard Optional

Screen Colors

Sceadu's screen is available in 6 standard and 18 optional colors. Ask us for a color swatch. It will be a pleasure to send you a set for free.

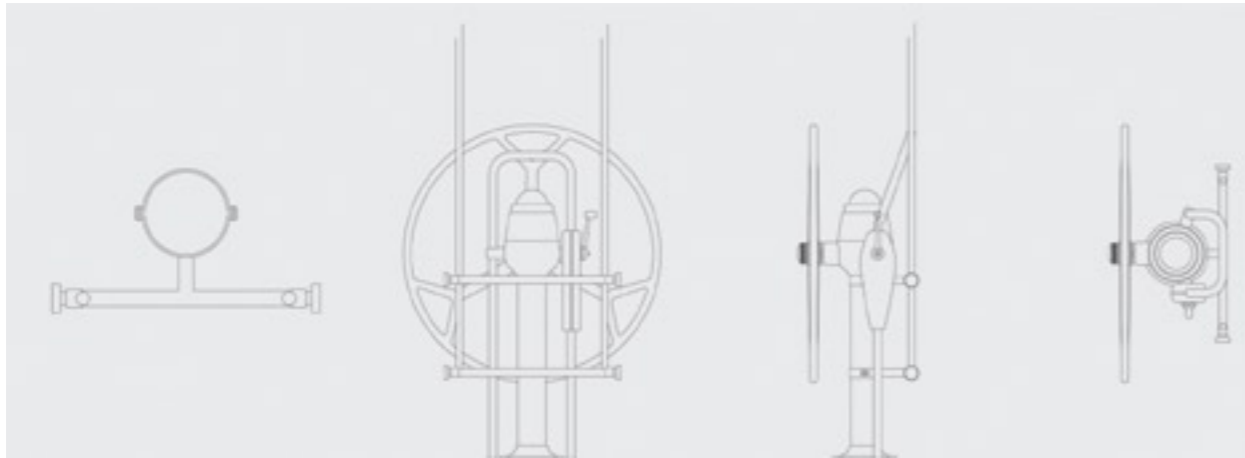

Easy Installation

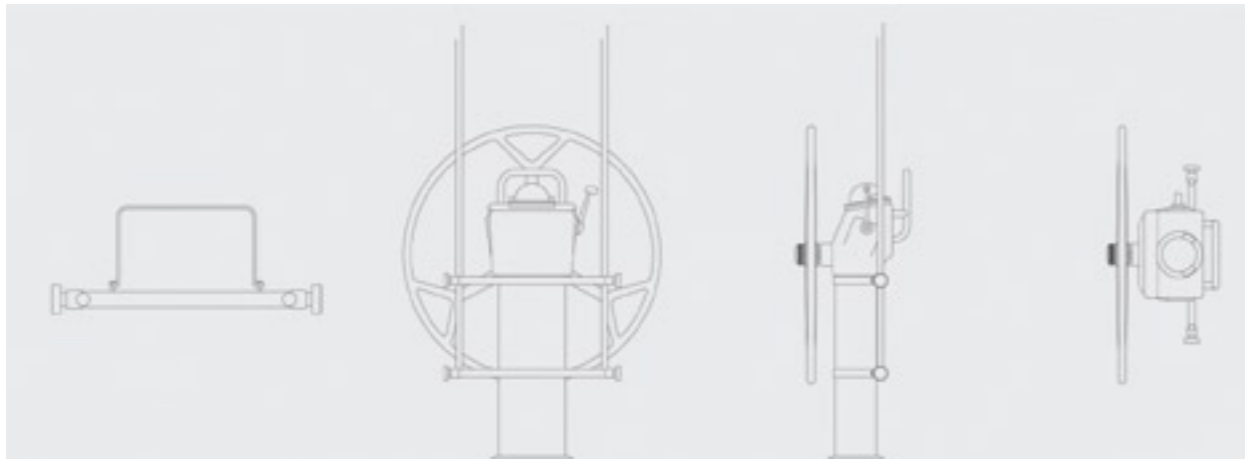

No more drilling, no more straps! Scedu has made the installation of a biminitop easier than ever. Everybody is capable of setting up or taking apart this biminitop in only a few minutes. With limited storage space in mind we made Scedu very compact and easy to store.

During the testing process we submitted the Scedu biminitop to wind forces of over 90 klms per hour.

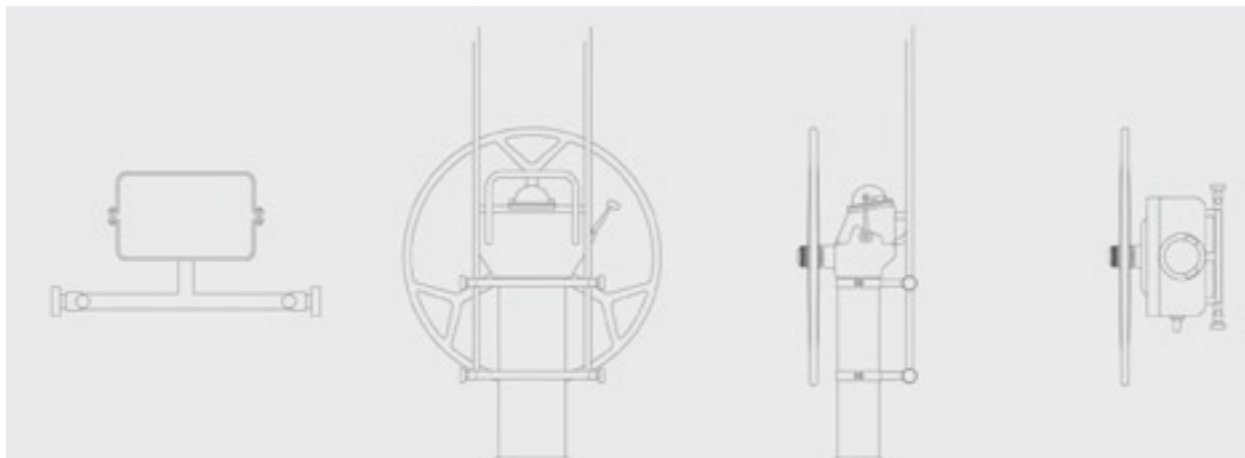

■ Round Console Fixation

■ Rectangular Fixation

■ Rectangular Fixation Extended

■ Standard □ Optional

Fixation Systems

To install Scedu on board of your ship you can choose one of the standard fixing systems, or we can supply you with a custom build system if none of the standard ones are suitable for your needs.

Rain Cover

With this optional rain cover you can transform your Scedu into a completely waterproof top.
